MrGuard
Integrated Security System

MRGUARD is the easiest way of effective supervision over large-scale security applications. A lot of eminent and large projects as well as more than twenty years of continuous support & development are certain guaranties. These guaranties are crucial when it comes to security.

- Large-scale projects
- User permission management
- Distributed client-server architecture
- Redundancy for servers and connections
- On-line & off-line operation

- Powerful relation engine
- Wide range of supported technologies
- Add-on features of technologies
- Smooth vector graphics with imports
- Scalability – investment protection

MrGuard
Integrated Security System

COLSYS

Integration

- Fire detection
- Voice evacuation
- Intruder detection
- Access control
- Time & Attendance
- Visitor management
- Camera surveillance
- Powerful databases
- Vast range of data formats
- Networking technologies

Basic Characteristics

SW **MRGUARD** brings easy, user-friendly and effective supervision, control or administration to large security installations. Distributed network architecture, a range of technological interfaces, user-friendly, smooth and fast graphical interface or highly developed management of user permissions make **MRGUARD** the best choice for security sensitive applications. **MRGUARD** helps ordinary users to respond easily, quickly and correctly to both everyday and outstanding situations. It is also a way for the security managers to enforce required procedures and rules. With **MRGUARD**, managers get an immediate view and analytical tool, which supports their decision-making.

In large applications **MRGUARD** helps to split the supervision into parts depending on responsibility for specified technologies or locations. Thanks to the powerful relation engine, virtual & add-on technological functions and a range of interfaces, **MRGUARD** is the right solution for effective security automation and integration.

MRGUARD is a purpose-built SW application, which requires only configuration. With **MRGUARD**, there is no need for time-consuming and expensive programming. Yet thanks to the modular architecture and flexible development team, tailor-made solutions are still possible and affordable.

Functions

- Alarm management
- Alarm guide
- Event history
- User event filters
- Event recording
- Alarm maps & floor plans
- Smooth floor plan zoom
- Physical topology tree
- Logical structure tree
- Control of technologies

- ■ Fire detection
- ■ Voice evacuation
- ■ Heating
- ■ Other inputs & outputs

- ■ Intruder detection
- ■ Time & Attendance
- ■ Ventilation
- ■ Centralised supervision

- ■ Camera surveillance
- ■ Presence of persons
- ■ Air conditioning
- ■ Data security
